

**Thank you for visiting Sattler.**

We'd like to offer you a discount of  
10% off your next full roll.  
Offer is valid on one roll only  
and only in the month of  
November 2020. \*

\*Send this PDF together with your order, limit one discount per company,  
may not be combined with any other offers.

## -> SUNPROTECTION DESIGN SELECTOR

With our **DESIGN SELECTOR** you get the possibility to combine all the shade fabrics in our Shade Design Selector or all cut yardage fabrics in the Casual Furniture Design Selector.

Be it retractable awning, fixed awning, umbrellas, body cloth or throw pillow, each can be chosen separately. This way you will gain a first impression of which fabrics fit the best together.

## -> CASUAL FURNITURE DESIGN SELECTOR

Once you have made your decision, you can use the online tool to print out the selection information to share with your dealer/retailer. With just four simple steps, you can relax, enjoy, compare, select and send your inquiry.

Additionally, you're able to embed this tool in your own website.

## SATTLER OFFERS PREMIUM QUALITY IN **EVERY FIBER.**

Our premium awning and marine fabrics are made from 100 % solution-dyed branded acrylic. This guarantees top-level functionality, and outstanding UV protection. Colors resist fading, and fabric will not break down even after years of exposure to the sun.

Your benefits:

- Colors remain bright and luminous for many years
- High UV fastness protecting the colors from fading as well as fabric degradation
- Outstanding water, dirt and fungus repellency
- Best weather-proof outdoor fiber

[-> Learn more about Sattler Quality & Features](#)

Sattler:  
**Solution-dyed acrylic**  
Color pigments are infused all the way to the core of the fiber.

Other Qualities:  
**Yarn-dyed fiber**  
Pigments penetrate just the outer surface of the fabric; thus these fabrics fade faster.

TRIO® - the multilayer quality for all those applications which have sensitive surfaces such as powder or gel coated frames.

-> TRIO

The elastic behavior in warp and weft of the ATLAS membranes is much more homogeneous than that of conventional fabrics. That's why it's the perfect quality for architectural applications.
