EXPO®

Session Overview

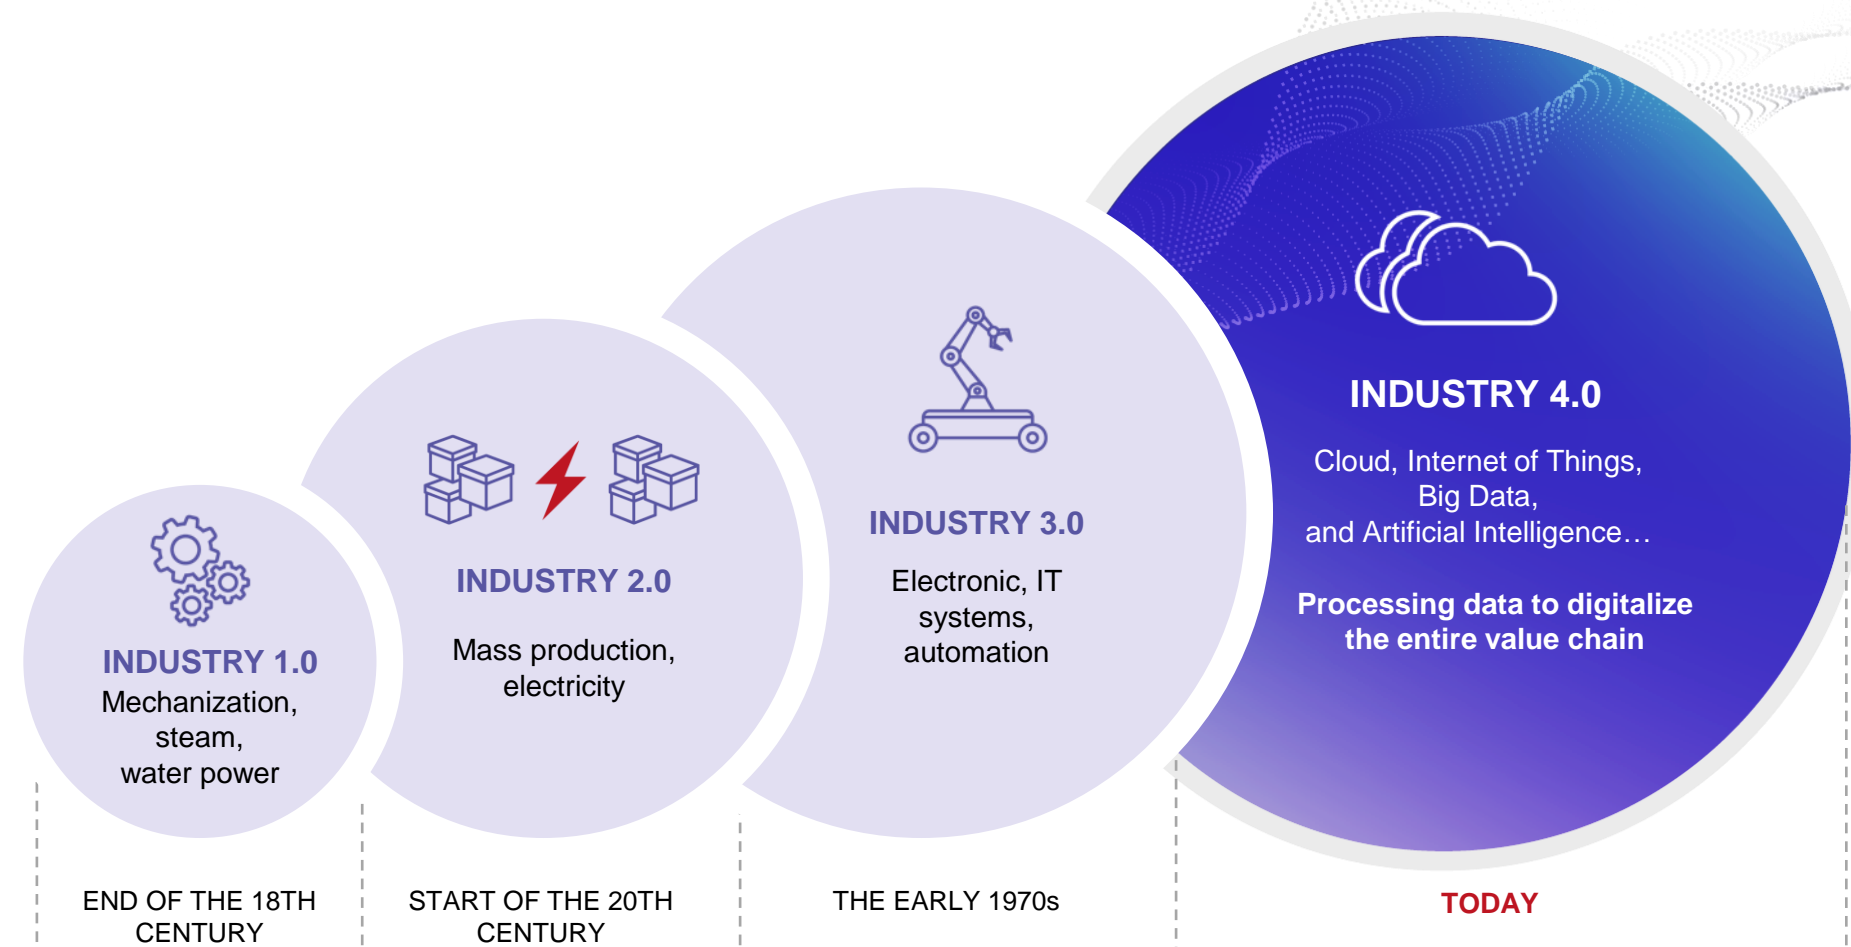

The protective wear and defense industry, vital for safeguarding American workers, is experiencing rapid growth, projected at 6.7% CAGR by 2030. This surge is driven by heightened workplace safety awareness, strict regulations, and global security concerns.

Embracing Industry 4.0 has become a game-changer. The integration of smart technologies, automation, and data analytics into manufacturing processes is enhancing efficiency, reducing production costs, and improving overall product quality.

Through this discussion, participants will gain an understanding of:

- Advanced Equipment Integration
- Industry 4.0: Exploring the impact of cloud-based solutions
- Innovative Applications
- Future Trends and Opportunities

Industry 4.0 - Transforming industrial processes

The fourth industrial revolution will be a major step forward in **interconnecting all participants in the value chain**, with smarter and more agile companies.

Industry 4.0 - Corporate Social Responsibility
